

Surgery in Children

1st April 2008 – 31st March 2010

- NCEPOD is conducting a national study to review remediable factors in the processes of care of children (aged 17 and younger at the time of procedure) who die within 30 days of a surgical procedure
- Questionnaires are being sent to the surgeon and anaesthetist who performed the primary procedure. Once completed they should be returned alongside copied extracts of the casenotes.
- Once anonymised, these casenotes are being peer reviewed by a multidisciplinary group of advisors
- **Please return all completed questionnaires and casenotes to NCEPOD in a timely manner either directly to NCEPOD or via the Local Reporter**
- For further information: please see our study page at <http://www.ncepod.org.uk/ps.htm> or email paediatricsurgery@ncepod.org.uk or call 020 7631 3444.

The staff at NCEPOD are very grateful for your support
